PURPOSE

The Management of Biddulphs Removals & Storage S A (Pty) Ltd believes that it must conduct its operations with concern for the environment and minimise any possible adverse impact on the environment.

SCOPE

Biddulphs International is committed to sustainable operations by sourcing and procuring consumables from renewable and recycled materials wherever possible. This policy aims to minimise our ecological footprint by continuously modifying internal processes to reduce waste generation across all removal and distribution activities.

Definitions and Abbreviations

See IO-GUIDE-01 Abbreviations and Definitions

POLICY

Biddulphs is therefore committed to:

- Complying with applicable environmental legislation and regulations.
- Optimising the use of water, electricity, fuel, lubricants and packing materials to reduce waste and cost.
- Recycling packing materials, office waste, and lubricants while encouraging customers to use recycled options.
- Procuring consumables and packing materials from environmentally responsible producers
- Committed to preventing pollution through the rigorous maintenance, storage, and disposal of materials, ensuring that all non-recyclable waste is handled in an environmentally acceptable manner.
- Ongoing monitoring and assessment of our operational activities to progressively reduce environmental impacts and track our sustainability achievements.
- Providing the resources, education and training required to enable all staff to participate in the environmental management system.
- Commitment to reducing fossil fuel usage by installing solar energy alternatives across its branch network whenever possible.
- Communicating the policy to all employees and encouraging the involvement of people at all levels to implement the policy and improve environmental performance.
